

Singularities, Differential Equations, and Transcendence

CIRM - Marseille - January, February 2025

Logarithmic and non-archimedean methods in singularity theory
27 - 31 January

Foliations, birational geometry and applications
3 - 7 February

Tame geometry
10 - 14 February

Galois differential theories and transcendence
17 - 21 February

Enumerative combinatorics and effective aspects of differential equations
24 - 28 February
